AUTOMATIC TYRE KILLER

The Automatic Tyre Killer series is available in two different versions:

PS-1625Y / PS1625B: Like PS-1620 model but with ability to charge and fire (unlimited) while connected to a 110-220V power source. When used as stand-alone the unit will fire 8 times.

PS-1630Y 1 PS1630B: (NATO model) The replaceable battery fires 24 times before it needs to be recharged. Rechargeable from a standard car battery. 1630 model has the ability to pair with other units (1630 or up) thus increasing the reach of the spike strip from 5.5 to 11 meters with a single remote control. The remote control uses smart technology. The 1630 model has a GPS unit including time registration for capturing data when the Automatic Tyre Killer is deployed.
